

SKIN TREATMENTS

BBL (BroadBand Light)

Light-based skin rejuvenation technology. It evens out skin tone, supports collagen production, and provides a more vibrant appearance.

Why BBL?

With BBL technology, a younger-looking complexion is now possible.

- ✔ Skin tightening and firming are supported.
- ✔ It helps to even out skin tone.
- ✔ The appearance of fine lines may be reduced.
- ✔ A more vibrant and healthy skin appearance can be achieved.

Also BBL;

- ✔ Sunspots.
- ✔ Acne and acne scars.
- ✔ Rosacea (rose disease).
- ✔ It can be applied as a support in many skin problems such as skin tone irregularities.

How is BBL implemented?

A detailed, personalized skin analysis is performed.

The Skin Tight protocol is applied to increase skin firmness and support collagen production:

- Minimum 4 seans
- Depending on the need, it may require 6-8 sessions.

Post-application

- He can return to his daily life immediately.
- To protect the skin and support results: Regular use of sunscreen is recommended.

Who is it not applicable to?

- Pregnant women
- Epilepsy patients
- Those with open wounds in the application area
- Those receiving Roaccutane (Zoretanin) treatment
- Cancer patients undergoing treatment

Session intervals:

- It is applied every 2-3 weeks.
- To maintain the results, follow-up sessions are recommended after 6 months to 1 year.
- BBL transactions can be safely performed at any time of the year.

EMFACE

Non-surgical facial tightening and lifting treatment.
It aims to reduce the appearance of wrinkles by targeting both skin and muscle tissue simultaneously.

Why EMFACE?

EMFACE technology offers a new generation of lifting technology that targets skin and muscle tissue simultaneously.

- ✔ Collagen and elastin production is increased.
- ✔ The skin gains a firmer and smoother appearance.
- ✔ Facial features are lifted and reshaped.
- ✔ Facial muscles are strengthened and supported.
- ✔ The appearance of wrinkles is reduced.
- ✔ A natural lifting effect occurs.

Post-application

- No rest or lifestyle restrictions are required after the procedure.
- The person can resume their daily activities as soon as the procedure is complete.

Who is it not applicable to?

- Individuals with pacemakers
- Those who have metal (platinum, etc.) implants in their bodies
- Pregnant women
- Those who have open wounds or active infections in the area where the procedure will be performed

How to apply EMFACE?

Before the procedure, the facial area is evaluated and a personalized plan is created.

Thanks to special pads placed on the forehead and cheek areas, facial muscles are activated with electromagnetic energy, while simultaneously radiofrequency technology heats the skin, promoting tightening.

EXION

Advanced technology that supports skin volume without fillers or injections. By increasing hyaluronic acid production, it gives the skin a fuller and more natural look.

Why EXION?

EXION technology provides natural fullness, firmness, and rejuvenation in a single application.

- ✔ It provides a natural increase in skin volume without injections.
- ✔ Increases hyaluronic acid production for a fuller and more vibrant appearance.
- ✔ It tightens the skin by promoting collagen production.
- ✔ It offers a powerful effect with radiofrequency and ultrasound technology.
- ✔ It activates the skin's own regeneration mechanism.
- ✔ It provides a brighter, healthier, and more balanced complexion.

Post-application

- He can return to his daily life immediately.
- Keeping the skin moisturized and using sunscreen regularly is recommended.
- Drinking enough water supports the skin's regeneration process and accelerates healing.

Who is it not applicable to?

- Pregnant women (due to unclear effects of ultrasound and radiofrequency).
- Individuals with open wounds or active infections in the treatment area.

How to apply EXION?

- In a clinical setting, it is administered in sessions that are completed in a short period of time.
- A personalized treatment plan is created based on the individual's skin type.
- It is applied to the skin in a controlled manner using a special applicator head.
- It offers a painless and comfortable procedure process.
- It penetrates the deeper layers of the skin, providing deep regeneration.

EMFUSION

Emfusion is the only treatment that extends the life of the skin while instantly giving it a vibrant and healthy appearance, using its patented DYNAMiQ technology and a specially formulated blend of active ingredients.

Why is the skin barrier important?

- ✔ Electroporation technology facilitates the penetration of active ingredients into the skin.
- ✔ It strengthens the skin barrier, helping to create a healthier and more resilient structure.
- ✔ The skin becomes more hydrated and has a fuller appearance.
- ✔ It offers a painless and comfortable application process.
- ✔ It supports the skin's natural regeneration process.

Post-application

- Avoid hot showers, saunas, and Turkish baths for 24 hours.
- Do not use active ingredients (acids, retinol) for 1–2 days.
- Do not neglect sunscreen use.

Who is it not applicable to?

- Pregnant women
- Individuals with pacemakers
- Those with metal implants (e.g., platinum)
- Patients with epilepsy
- Individuals active skin infections (cold sores, open wounds, active acne)
- with severe eczema or dermatitis

How to apply EMFUSION?

EMFUSION's DYNAMiQ technology activates the skin barrier formation processes by triggering epidermal resonance. During this process, specially formulated active ingredients that support the skin barrier and instantly improve the skin's appearance are applied to the skin. This strengthens the skin barrier and gives the skin a more vibrant and balanced look.

FROZEN EYES

A specialized eye contour treatment using microcurrent and radiofrequency. Aims to achieve a more rested, brighter, and fresher appearance of the eye contour area.

Why Frozen Eyes?

Frozen Eyes technology provides an effective touch for more vibrant and rested eyes.

- ✔ Helps reduce the appearance of light puffiness around the eyes.
- ✔ Softens the appearance of fine lines.
- ✔ Supports evening out skin tone irregularities.
- ✔ Revitalizes the eye area with microcurrent and radiofrequency technology.
- ✔ Provides a more rested, bright, and fresh look.
- ✔ Offers special, comfortable care for the delicate eye area.

Post-application

- A return to daily life is possible immediately.
- Mild redness may occur on the skin, but it will subside quickly.
- The use of sunscreen is recommended.
- Following skincare recommendations supports these results.

Who is it not applicable to?

- To pregnant women
- People with open wounds in the area where the procedure will be performed

Which regions is it applied to?

- around the eyes
- Upper eyelid

How many sessions are recommended?

- The implementation plan is determined according to the individual's needs.
- Generally, a total of 4 to 6 sessions are recommended, either once a week or every 7–10 days.

FROZEN FACE

A needle-free mesotherapy treatment that rejuvenates and revitalizes the skin. It ensures the effective delivery of vitamins and active ingredients beneath the skin.

Why Frozen Face?

FROZEN FACE technology provides a needle-free, comfortable, and instantly radiant treatment experience.

- ✔ Needle-free mesotherapy enables the effective delivery of substances under the skin.
- ✔ The skin is intensely nourished with vitamins, amino acids, and hyaluronic acid.
- ✔ The skin gains a brighter, more vibrant, and plumper appearance.
- ✔ It offers an easy, fast, and convenient application process.
- ✔ Effective results are achieved in regionally targeted areas.
- ✔ The skin's moisture balance is supported, resulting in a healthier structure.

Post-application

- The treated area should not come into contact with water for 12 hours after the procedure.
- Makeup and cosmetic products should not be used.
- No bruising or swelling occurs, and the person can immediately return to their daily life.

Who is it not applicable to?

- To pregnant women
- Those with open wounds in the application area
- For people with diabetes and heart disease

Who is it suitable for?

- It can be preferred by anyone who has signs of aging on their skin and wants to revitalize it and provide extra care. There is no age limit.

How to Apply?

- After skin analysis, serums are prepared to meet individual needs.
- The procedure takes approximately 40 minutes and is painless.

Which regions is it applied to?

- Face (forehead, cheeks, chin, eye area)
- Neck

How many sessions are recommended?

- Usually 4 sessions are applied.
- Maintenance sessions are recommended in the following periods to ensure the continuity of the effect.

ANIONIC CARE

Anionic treatment is an advanced skincare treatment applied with O2toderm technology, aimed at purifying and supporting the skin's renewal process.

Why Anionic Care?

With Anionic Maintenance technology;

- ✔ By allowing anionic oxygen to reach the deeper layers of the skin, it activates cells and energizes the skin.
- ✔ It helps reduce the negative effects of environmental toxins and air pollution.
- ✔ The treatment, which is supported by LED light, helps vitamins to be delivered to the skin more effectively.
- ✔ A cleaner, clearer, and healthier-looking complexion is promoted.

Post-application

- Do not wear makeup for the first 24 hours.
- Sunscreen is used.
- The skin is gently cleansed.
- Saunas and strenuous exercise are avoided.

Who is it suitable for?

- O2toderm anionic treatment can be safely applied to all skin types. After the treatment, the skin becomes more hydrated, vibrant, and radiant.

 **Fraise**
Beauty - Aesthetics - Longevity

How is Anionic Care Applied?

O2toderm anionic treatment is an extremely comfortable and convenient procedure.

Using a full-face LED light system and a device that produces 90% pure anionic oxygen, negative ions are delivered to the skin.

Anionic oxygen is absorbed into the body not only through the skin's surface but also through respiration, contributing to increased oxygen levels in the blood and offering support against free radicals that contribute to skin aging.

VACUUM SKIN CARE (HYDRA POWER)

Deep cleansing, moisturizing, and revitalizing all in one. Evens skin tone and helps reduce the appearance of pores.

Why Vacuum Facial Treatment?

Vacuum Facial Treatment with Hydra Power

Hydra Power technology combines a vacuum cleansing system with powerful serum protocols. Active ingredients, selected according to the skin's needs during application, are delivered more effectively to the deeper layers of the skin with the help of vacuum suction. This not only cleanses the skin but also gives it a fuller, more vibrant, and healthier appearance. Hydra Power offers particularly effective results on dull, dehydrated, and congested skin.

Post-application

- Makeup should not be worn on the day of the procedure.
- Sunscreen should be applied after treatment.
- Sun exposure and tanning beds should be avoided on the same day.
- Hair removal should not be performed on the face for a few days before and after the procedure.

 **Fraise**
Beauty - Aesthetics - Longevity

How to use HYDRA POWER?

After cleansing the skin, solutions tailored to the skin's needs are applied gradually using a vacuum system. The procedure takes approximately 45 minutes.

At the end of the session, LED therapy and mask application are performed.

How many sessions are required?

- Depending on skin needs, it is generally recommended to use it every 21 days.
- The number and intervals between sessions may be adjusted individually for certain skin types.

SKIN ANALYSIS (VISIA)

An advanced system that analyzes the surface and underlying layers of the skin in detail. It forms the basis of personalized care and treatment plans.

Let's clarify your needs with a skin analysis.

With advanced skin analysis technology, we accurately determine your skin's needs. Canfield Scientific's VISIA imaging system allows for a detailed examination of both the surface and underlying layers of your skin.

Based on the data obtained:

- Your skin's current condition will be objectively assessed.
- A personalized care and treatment plan will be created for you.
- Progress is monitored comparatively throughout the process.

Every analysis is recorded, and the results are shared with you transparently.

Comparative Skin Assessment

The VISIA system also compares your skin characteristics to those of people in the same age group, gender, and skin type. This allows for a clearer and more understandable picture of your skin's condition.

Main Parameters Evaluated in Skin Analysis

- Wrinkles
- Skin roughness (smoothness)
- Pore structure
- Superficial stains
- Porphyrins (acne bacteria residues that accumulate in pores)
- UV spots (deep sun damage)
- Brown spots (age-related subcutaneous discoloration)
- Red areas (capillary density and skin sensitivity).
