

IV THERAPY

 **Fraise**
Beauty - Aesthetics - Longevity

WHAT IS IV (INTRAVENOUS) THERAPY?

VITAMINS • MINERALS • ANTIOXIDANTS

IV therapy is a supportive treatment method that allows vitamins, minerals, amino acids, and antioxidants to be administered directly into the bloodstream.

Thanks to this process, micronutrients bypass the digestive system and enter the bloodstream directly, where they can be used more quickly by cells.

Absorption of orally administered supplements depends on many factors and is generally limited. In intravenous administration, however, bioavailability is higher because vitamins and minerals are delivered directly into the bloodstream.

IV THERAPIES IN MODERN CLINICS;

Supporting the immune system

To support cellular repair processes.

To strengthen energy metabolism.

To improve overall well-being.

It is implemented in different protocols for this purpose.

METABOLIC AND ANTIOXIDANT SUPPORT

NAD+

NAD+ is an important coenzyme involved in cellular energy production.

It contributes to the healthy functioning of metabolic processes and plays a role in cellular repair mechanisms.

It is an important molecule that can help support energy levels and maintain mental function.

ALPHA LIPOIC ACID

Alpha-lipoic acid is a powerful antioxidant that is soluble in both water and fat. It supports cellular energy production and provides protection against free radicals.

It is an important micronutrient that supports metabolic balance and helps maintain cellular health.

SKIN, HAIR, NAIL PROTOCOLS

COLLAGEN BOOSTER – ANTI AGING

The Collagen Booster protocol consists of a combination of vitamins and antioxidants formulated to support skin health.

It contains micronutrients that support collagen production and contribute to maintaining skin elasticity. It also aims to promote a more vibrant and healthy skin appearance by helping to reduce oxidative stress.

HAIR & NAIL COCKTAIL

It consists of a combination of vitamins and minerals that support hair and nail health.

It contains micronutrients that can help nourish hair follicles and contribute to stronger-looking hair and nails.

It can help protect hair and skin quality by reducing cellular stress caused by free radicals.

DETOX AND METABOLISM

GLUTATHIONE

Glutathione is one of the body's most powerful antioxidants and helps protect cells against free radicals. It plays a role in detoxification processes and supports cellular renewal mechanisms. It is also an important antioxidant that supports overall health and skin health.

VITAMIN C

Vitamin C is an important antioxidant that supports the normal functioning of the immune system. It plays a role in collagen synthesis, supporting the health of skin, blood vessels, and connective tissues. It helps protect cells against oxidative stress and is an essential vitamin for overall health.

ENERGY AND RELAXATION

FRAISE MIX (ENERGY COCKTAIL)

Fraise Mix is an energy-boosting IV protocol consisting of vitamins, minerals, and electrolytes.

It contains micronutrients that support energy metabolism and helps maintain energy levels in a busy lifestyle.

It also aims to contribute to the balancing of metabolic processes.

well being*

IMMUNITY AND ENERGY PROTOCOLS

IMMUNE BOOSTER COCKTAIL (IMMUNITY BOOSTER)

This is a combination of vitamins, minerals, and antioxidants formulated to support a strong and balanced immune system.

This protocol includes micronutrients that can support the body's natural defenses against infections.

It can be preferred to provide immune support during periods of intense stress, seasonal changes, or before travel.

COENZYME Q10

Coenzyme Q10 is a naturally occurring compound that plays a role in cellular energy production and possesses strong antioxidant properties.

It contributes to the healthy functioning of mitochondria and can help protect cells against oxidative stress.

It can help support energy levels and increase overall feelings of vitality.
